

VF-31 TOMCATTERS

DECAL SET

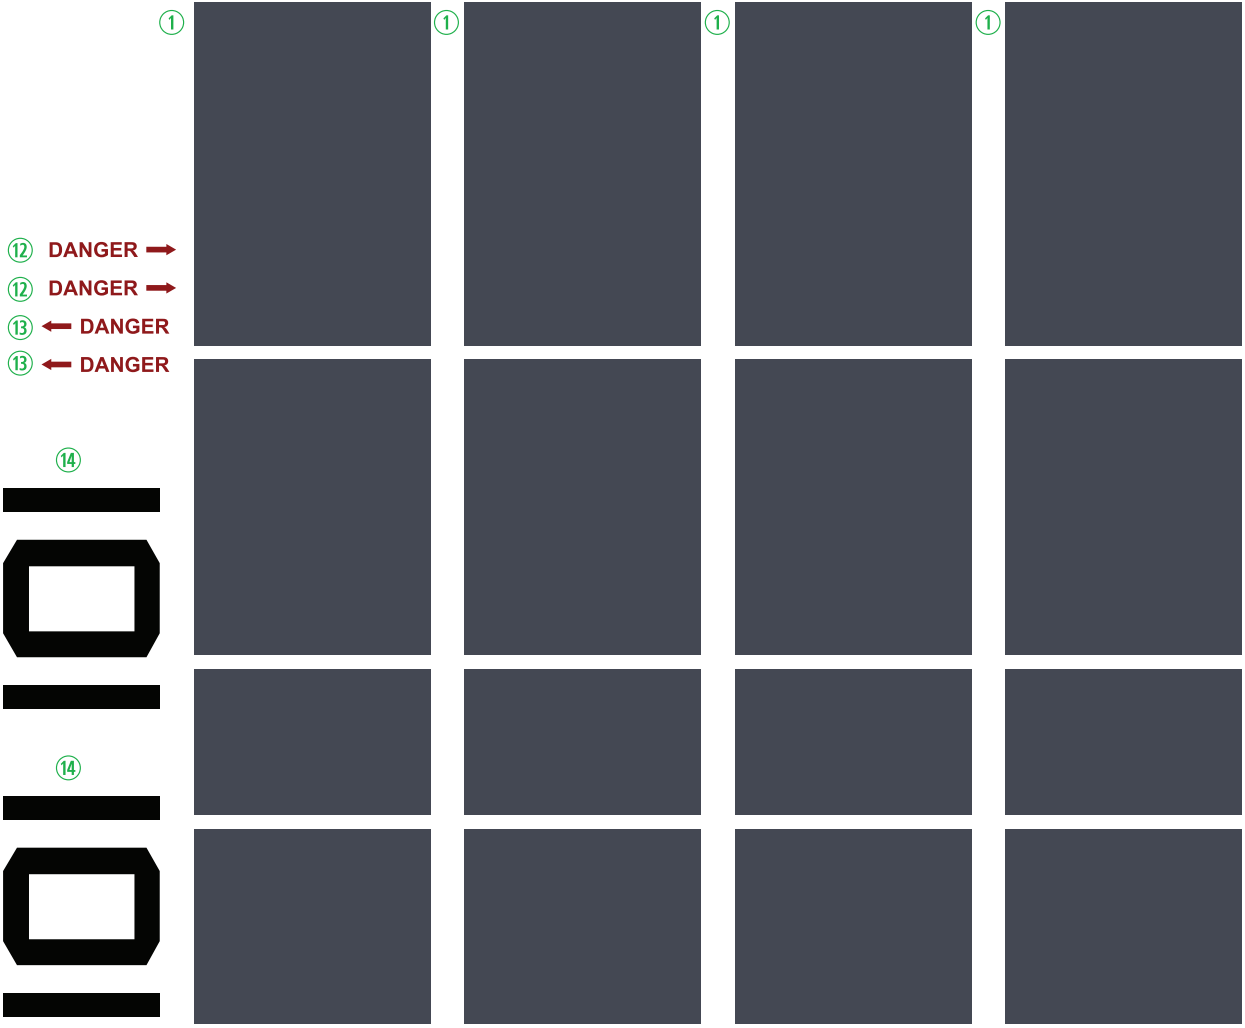

for 6mmFlyRC's F-14 Tomcat

The VF-31 Tomcatters are the second oldest continuously active USN squadron (the oldest being the VF-14 Tophatters), having first been activated as the VF-1B Shooting Stars in 1935 and, after several changes, being redesignated VF-31 in 1948. VF-31 is the only US squadron (USN, USMC, or USAF) to have confirmed kills in World War II, Korea, and Vietnam.

VF-31 transitioned to the F-14 Tomcat in 1981, having previously flown the F-4 Phantom. They were the last Tomcat squadron to drop live ordnance in combat, the last Tomcat squadron operational in the Pacific Fleet, and flew alongside the VF-213 Blacklions in the final carrier cruise with Tomcats aboard. The last ever Tomcat to launch off a carrier was from VF-31, as were the last Tomcats to fly. In 2006 they transitioned to the F/A-18E Super Hornet and were redesignated VFA-31.

This decal set is not to be modified or sold.
Not to be hosted except on RCGroups.com and 6mmFlyRC.com.
Commercial use is restricted to free distribution with 6mmFlyRC kits.
Printing by commercial operators (Kinko's, etc.) is allowed for **personal use only** - mass reproduction is prohibited.
